Regional Business Registries portal

• Achieving easy and straightforward access to all electronic services provided by the Regional Business Registries portals, will be designed a Service Provisioning Platform.

• This platform acts as a Point of Single Contact for all the services provided by the included registries and will provide centralized online access to services on a single location on the internet.
Regional Business Registries portal

- Provided by the Serbia (SBRA) and Macedonia (CRRM), the Regional Business Registries portal has been designed as a Service Platform, to which other potential registers from the western Balkans could get connected.
Regional Business Registries portal

The platform consists of following logical components:

- Digital Identity management component
- Data distribution / Electronic service provisioning (ESP) component
- Data modeling component
- Data collection
- Pricing, Billing and Settlement component
- Service pricing management for all available services
- Billing mechanism for all paid services provided on this platform
- Settlement component for service fee calculation
Regional Business Registries portal
